

A pair of hands is shown from the chest up, holding a glowing, fiery Earth globe. The background is dark with many small, bright stars, suggesting a cosmic or space theme. The hands are positioned at the bottom, cupping the globe. The globe itself is bright orange and yellow, with dark, swirling patterns representing the Earth's surface.

# The end of global warming?

# COP28

2023 UN Climate  
Change Conference

## • Early warnings

*At COP 27, the U.N. launched an ambitious plan to set up a global early warnings system. The plan will require funding of \$3.1 billion over the next five years.*

## • Loss and damage

*The loss and damage agreement aims to aid low-income countries affected by climate change, but there are still questions about funding distribution.*

## • Climate finance

*a Group of Seven-led partnerships that use blended finance to help emerging economies transition away from overreliance on coal to a more green energy mix.*

## • Global Stocktake

*The first Global Stocktake — which is a process for taking stock of the implementation of the Paris Agreement globally — will also come to an end at COP 28.*

## • Global goal on adaptation

*The Paris Agreement established the Global Goal on Adaptation to drive collective action on climate adaptation.*

## • Food systems

*At COP 27, countries agreed on a new four-year plan on agriculture and food security.*

## • Just Energy Transition Partnerships

*a Group of Seven-led partnerships that use blended finance to help emerging economies transition away from overreliance on coal to a more green energy mix.*

The UAE has named  
Dr. Sultan Ahmed Al Jaber  
as President-Designate for Cop28.

DAVID BROWER, CONSERVATIONIST (USA)

An aerial photograph of a small, low-lying island in the middle of a vast, clear blue ocean. The island is densely packed with small, simple houses with dark roofs. The water around the island is a vibrant turquoise, and several small boats are visible in the shallows. The sky is a pale blue with a few wispy clouds. The overall scene conveys a sense of isolation and vulnerability.

overall if they are charged using solar or wind power.

For most Jordanians, Zayyat said, “the issue is a matter of savings, not an environmental issue at all”.

“The environment is the last thing one would think about,” he added.
